

PIF-QoL Terms of Use and License Agreement

Version 1.0 | Effective Date: August 1st, 2026

About the PIF-QoL

The PIF-QoL is a patient-reported outcome questionnaire designed to assess quality of life in pediatric intestinal failure. Two versions are available:

- Child self-report
- Caregiver proxy-report

These versions are available separately via the REDCap Shared Library and are intended for use in research and clinical settings in accordance with the Terms of Use and License Agreement (this “Agreement”) below.

This Agreement governs access to, download of, and use of the PIF-QoL made available through the REDCap Shared Library by or on behalf of the authors of the PIF-QoL (collectively, the “Copyright Owner”). By downloading, accessing, copying, using, administering, reproducing, or distributing the PIF-QoL, the user (the “User”) agrees to be bound by this Agreement. If the User does not agree to this Agreement, the User shall not download, access, or use the PIF-QoL.

1. User Information Form

All users must complete the PIF-QoL User Information Form prior to use. The form collects basic information about the context of use and contact details. This information helps the Copyright Owner track usage and, at the Copyright Owner’s sole discretion from time-to-time, inform users about relevant research collaborations. Use of the PIF-QoL without completing the User Information Form is prohibited.

2. Ownership

The PIF-QoL, including all questions, instructions, scoring materials, formatting, compilation, revisions, adaptations, related documentation, and all copyrights and other intellectual property rights therein and thereto, are and shall remain the sole and exclusive property of the Copyright Owner. No ownership rights are transferred under this Agreement. All rights not expressly granted herein are reserved.

3. License; Permitted Use

Subject to the terms, conditions, and restrictions of this Agreement, the Copyright Owner grants to the User a limited, revocable, non-exclusive, non-transferable, non-sublicensable license to download and use the PIF-QoL solely for the User’s own non-commercial academic research, educational purposes, and clinical practice. The PIF-QoL is available free of charge for non-commercial academic research, educational purposes, and clinical practice. Use is “non-commercial” if its primary purpose is not the generation of revenue or direct financial benefit to the User or the User’s organization, regardless of whether the User’s organization is a for-profit entity.

4. Commercial Use and Industry-Sponsored Research

Any use for which the primary purpose is commercial gain, including incorporation into for-profit products or services, use in industry-sponsored clinical trials, or use under contract with a for-profit sponsor for revenue-generating purposes, is not permitted under this Agreement and requires a separate paid licensing agreement with the Copyright Owner's prior written permission. To request a commercial use license, contact the corresponding author at the address below.

5. Implementation and Restrictions on Modification

The PIF-QoL must be used in its original, unmodified form. Because scoring functionality is embedded in the instrument's electronic format, use is restricted to the electronic format only. Implementation in paper form is not permitted. Modification, adaptation, translation, abbreviation, creation of derivative works, or alteration of items, structure, or embedded scoring functionality is prohibited without prior written permission from the Copyright Owner. User shall not remove, obscure, or alter any copyright notice, trademark, proprietary legend, attribution, disclaimer, or other notice appearing on the PIF-QoL.

6. Attribution

Appropriate scholarly credit must be given in all publications, presentations, and reports. Suggested citation:

Neumann, M. L., Ladner, A., Allen, J. Y., Kakani, S., Rauen, M. H., & Mercer, D. F. (2025). Measuring disease-specific quality of life in pediatric intestinal failure: Development and validation of the PIF-QoL. *Intestinal Failure*, 8, 100324.

User shall not state or imply that Copyright Owner, the Board of Regents of the University of Nebraska, or the University of Nebraska Medical Center endorses the User's study, findings, institution, or conclusion.

7. Distribution

The PIF-QoL may not be redistributed, sublicensed, or made publicly available in whole or in part including, but not limited to, in any publication, presentation or report without prior written permission from the Copyright Owner. Without limiting the foregoing, the User shall not incorporate the PIF-QoL into any database, repository, website, platform, artificial intelligence model, machine learning dataset, assessment library, or other collection intended for redistribution, shared access, or repeated third-party use. If the User is conducting a multi-investigator or multi-site study, each investigator or site that wishes to access or use the PIF-QoL must separately agree to this Agreement unless the Copyright Owner agrees otherwise in advance and in writing.

8. Updates and Version Control

The Copyright Owner may update the PIF-QoL instrument or this Agreement at any time without notice to the User. Users must comply with the Terms of Use and License Agreement provided with the version of the PIF-QoL downloaded at the time of use. Use of the most recent version of the PIF-QoL is recommended to ensure consistency and validity in research and clinical applications.

9. Compliance with Law

The User shall not use the PIF-QoL in any manner that violates applicable law, regulation, ethical approval requirements, institutional policy, or the rights of any third party. The User is responsible for ensuring User's use complies with all applicable data privacy and security laws including, but not limited to, HIPAA, where applicable.

10. Term; Termination

This Agreement is effective upon the User's first access to, download of, or use of the PIF-QoL and shall continue until terminated. Rights to use the PIF-QoL may be revoked upon written notice if the User is found to be in violation of this Agreement. Upon receipt of a notice of revocation, the User shall promptly cease all use of the PIF-QoL and, upon request, destroy or return any copies in their possession.

11. Disclaimer

The PIF-QoL has demonstrated evidence of validity and reliability in studied contexts; however, no warranty is made that such properties will generalize to all populations or uses. The user is responsible for determining appropriateness for their specific application. The PIF-QoL is provided "as is" and "as available" without warranties of any kind, express or implied, including but not limited to warranties of merchantability, accuracy, completeness, fitness for a particular purpose, title, or non-infringement. The Copyright Owner makes no representations regarding the suitability of the PIF-QoL for any specific clinical or research application. The User assumes sole responsibility for determining whether the PIF-QoL is appropriate for the User's intended purposes and for all decisions, actions, analyses, interpretations, and conclusions based on the PIF-QoL. When downloaded for clinical use, the PIF-QoL serves as a supplemental clinical aid and does not provide diagnostic or treatment recommendations. Use of the PIF-QoL does not establish a patient-provider relationship with the authors, the Copyright Owner, the Board of Regents of the University of Nebraska, or the University of Nebraska Medical Center.

12. Limitation of Liability

To the fullest extent permitted by applicable law, the authors, the Copyright Owner, the Board of Regents of the University of Nebraska, the University of Nebraska Medical Center, and their respective affiliates, officers, employees, and agents shall not be liable for any claims, losses, damages, or expenses, including but not limited to direct, indirect, incidental, consequential, or punitive damages, arising out of or related to the use or misuse of the PIF-QoL in any context.

13. Governing Law

This Agreement shall be governed by and construed in accordance with the laws of the State of Nebraska, without regard to its conflict of laws principles.

14. General

If any provision of this Agreement is found to be unenforceable, the remaining provisions shall continue in full force and effect. This Agreement constitutes the entire agreement between the User and the Copyright Owner with respect to the use of the PIF-QoL and supersedes any prior representations or understandings.
